

LISTING OF THE CLAIMS

Please amend the claims as follows.

1. (Currently Amended) A container comprising:

complementary panels foldably joined along a hinge member;

at least one tray adapted for receiving at least one item, attached to a
respective one of said complementary panels; and

locking mechanism for selectively retaining said complementary panels in
face-to-face relationship with one another,

wherein at least one surface of the complementary panels is coated with a
barrier material to provide a substrate that blocks the migration of odors or
aromas from the container contents to the exterior.

2. (Currently Amended) A container comprising:

complementary panels foldably joined along a hinge member;

complementary trays attached to respective said complementary panels disposed for
alignment with one another when said complementary panels are folded into face-to-face
relationship with one another, at least one of said complementary trays adapted for receiving at
least one object; and locking mechanism for selectively retaining said complementary trays in
face-to face relationship with one another,

wherein at least one surface of the complementary panels is coated with a barrier material to provide a substrate that blocks the migration of odors or aromas from the container contents to the exterior.

3. (Currently Amended) The container for claim 2, wherein at least one of said complementary trays ~~including~~ includes a compartment.

4. (Original) The container of claim 2, wherein said complementary trays include respective compartments disposed for forming a cavity when said complementary trays are disposed in face-to-face relationship with one another.

5. (Original) The container of claim 2, said locking mechanism comprising said complementary trays having respective engagement members adapted for cooperatively receiving one another when said complementary trays are urged into face-contacting relationship with one another.

6. (Original) The container of claim 5, said respective engagement members comprising said complementary trays having corresponding male and female engagement elements.

7. (Original) The container of claim 2, further comprising grasping elements for facilitating separation of said complementary trays from face-contacting relationship.

8. (Original) The container of claim 7, said grasping elements comprising at least one of said complementary trays having a recessed region.

9. (Original) The container of claim 7, said grasping elements comprising at least one of said complementary trays having at least one flange extending along a respective edge of said complementary tray.

10. (Currently Amended) The container of claim 7, at least one of said complementary trays having a flange extending along each respective non-hinged perimeter edge.++

11. (New) A container comprising:

complementary panels foldably joined along a hinge member;

at least one tray adapted for receiving at least one item, attached to a

respective one of said complementary panels; and

locking mechanism for selectively retaining said complementary panels in
face-to-face relationship with one another,

wherein an interior surface of one of the complementary panels includes a
mirror.

12. (New) The container of claim 11 wherein the interior surface of
one of the complementary panels includes a mirror formed by depositing onto the
surface a layer of metallic ink.

13. (New) The container of claim 11 wherein the interior surface of
one of the complementary panels includes a mirror formed by laminating onto the
surface a layer of metallic foil.

14. (New) The container of claim 11 wherein the interior surface of
one of the complementary panels includes a mirror formed by inserting a mirror.
